

WALNUT CREEK POLICE OFFICERS' ASSOCIATION

1630 N. Main St., Ste 451
Walnut Creek, CA 94596

September 25, 2014

The Walnut Creek Police Officers Association has been associated with Safe Restraints Inc. / The WRAP since its inception in 1996. In fact, we are proud to be the first association to adopt The WRAP safety restraint system.

The Walnut Creek POA maintains a policy of one WRAP per patrol car and we are committed to using The WRAP both in our jail and on patrol. The WRAP's ability to shorten the non-cooperative arrest and control situations, along with the added safety features for all parties involved, are what we count on every day to enhance our ability to keep our officers and community safe. It has been such an effective tool that over time it has evolved as a critically important tool in our line-up of policing resources. The WRAP's ability to reduce injuries for all parties involved, reduce the likelihood for property damage, and limit officer civil liability exposure make it a key tool in our service to our community.

Based on the successful performance of The WRAP we have experienced over the past 18 years, we fully support and are proud to endorse The WRAP safety restraint system.

Sincerely,

Mike Watson
